## Cold and flu season is upon us

The best way to combat illness is to wash our hands. Here are a few tips to help stay healthy all winter long!

- First, wet your hands with water. Then add soap.
- Rub them together vigorously for 20 seconds. Make sure to rub the wrists, between the fingers, and under the fingernails. When you have time, use a nailbrush, as germs often hide under nails.
- Rinse your hands thoroughly and dry with a clean paper towel or air dryer.

If you are in a public restroom, shut the faucet off with a paper towel. Try to push the door open with your shoulder or use another paper towel to turn the knob.

Staying healthy is everybody's goal!

## Hospital updates focus on efficiency

Building a new hospital from the ground up creates a once-in-a-career opportunity: To construct a modern, customized facility that actually becomes a tool in and of itself to help caregivers do their jobs better than ever before.

The Northwestern Medicine Lake Forest Hospital is a textbook example of efficiency. Often times, people use the word 'efficiency' to talk about saving money. And the new hospital is a great example of that, too. But in this case, designers took great care to ensure the building would provide efficiency of something even more important, particularly when it comes to healthcare: Time.

In some cases, the new building's design along with new customized workflows, saves caregivers up to 70 minutes per shift. That translates directly to allowing clinicians more time at their patients' bedside.

That's what it is all about – creating a more intimate relationship between caregiver and patient," says Denise Majeski, MSN, RN, ACM, NE-BC, Chief Nurse Executive at LFH. "The new hospital building is designed to help us respond faster, enhance communication and deliver personal patient care."

## Top ten items to know about our fitness departments:

- Teen Youth Certifications are required for all 13 and 14 year olds to add on to their parent's accounts as junior dependents. The fee is \$35 for the certification and once this has been completed they must schedule a follow-up 45 minute Equipment Orientation.
- There is a buzzer located by the Fitness Desk that members can push for non-medical emergencies if they need assistance from a Fitness Specialist. Staff conduct rounds to help other members and this is an easy way to get their attention to the Fitness Desk.
- Fitness Specialists are here to help adjust equipment, show members how to perform proper exercises, perform blood pressures, wipe down equipment, etc.
- Fitness Specialists conduct rounds of the pools, track, and fitness floor every 30 minutes to ensure the safety of the members and the facility.
- Member Comment Cards can be found near both the fitness and front desks and can be used to leave positive/negative feedback about employees, equipment, group exercises classes, etc.
- Our Lake Forest facility hosts the Triumph Triathlon Training program year round for members of the facility and community to train for upcoming Triathlon events. They will utilize parts of the lap pool, cycling studio, and track during early mornings and later evenings.

- Fitness Specialists conduct Equipment Orientations for new members who choose that service when joining.
- During certain months of the year Fitness Specialists conduct monthly Wellness screenings.
- Fitness Programs are offered throughout the year for members to participate in. These programs include Lose to Win, Summer Fitness Challenge, and Holiday Fitness Challenge.
- Cell phone conversations are prohibited throughout the facility except in specific locations. There are designated areas for cell phone use throughout the club.  
**ALL ELECTRONIC DEVICES ARE PROHIBITED IN THE MEN'S AND WOMEN'S LOCKER ROOMS AT ALL TIMES AND WITH NO EXCEPTIONS.**

### The Northwestern Medicine Lake Forest Hospital Trainer Tips on How to Fall Back into Fitness

Fall is a great time to get back into your fitness routine. Work, school and social routines get back on track and so will your fitness routine. Research shows that forming a fitness habit will be more beneficial than having a sporadic exercise routine. Below are some tips to help you find your way.

- Aim to exercise at the same time of day so it becomes a regular part of your lifestyle. For example, you might walk every Monday, Wednesday, Friday and Sunday from 12-1 pm.
- Plan your week in advance. Look ahead at your commitments, make sure you schedule time to exercise multiple times each week.
- Try a new class or new exercise once a week. It will give you something different to look forward to while providing a good challenge for your exercise routine.
- Grab a friend and sign up for a fitness event (5k race, stair climb, bike race, etc.) It will help keep you on track as you stay motivated for your event.
- Reward yourself when you reach certain milestones. Splurge on new gym shoes, a new pair of running shorts, or a workout outfit.
- Plan a weekend get-a-way based around activity, such as an organized walk/run, exploring new hiking trails or scenic bike paths, etc.
- Don't forget to pack your workout clothes and shoes when you travel for business! Check out the hotels to make sure they have a fitness center. Most concierge services can provide walking/running routes (make sure they are safe) or alternate workout facility ideas.
- **HAVE FUN!** New exercise routines can be challenging and hard, but add a little fun and you will stick to the plan!
